

PENTAGONE®

Multi-Purpose Extraction System And Degreaser

PENTAGONE® is a unique aqueous-based decontamination and degreasing product developed for the cleanup of:

- Pentachlorophenol (PCP)
- Creosote
- Petroleum Hydrocarbons
- Chlorinated Hydrocarbons
- Polynuclear Aromatic Hydrocarbons
- Pesticide Spills
- Herbicide Spills

PENTAGONE has the capability of being applied as a foam blanket allowing easy application to overhead, vertical and horizontal surfaces.

PENTAGONE is formulated to decontaminate and degrease concrete, asphalt, wood and metal surfaces. Using our **Model T Jr. Foamer** the product is easily applied and removed from surfaces resulting in lower project labor costs.

PENTAGONE will achieve **superior extraction efficiencies** resulting in less work, less product usage and less hazardous waste to dispose of after the cleanup, providing **lower overall**

project cost than traditional decontamination technologies such as high pressure water blasting, shot blasting and scabbling. **PRODUCT COVERAGE: PENTAGONE** is a highly concentrated product which is diluted prior to use. For most surface decontamination projects: 1 part PENTAGONE to 4 parts water. Painted surfaces should be patch tested prior to application as paint softening or discoloration may occur.

PENTAGONE is available in 5- and 55-gallon containers.

Emergency information regarding ingestion, skin contact, eye contact or inhalation is included in the Material Safety Data Sheet (MSDS).
